🏆 Projects

- **Zippy Delivery**

As a Full-Stack Developer, I actively contributed to Zippy, a delivery service application. My hands-on experience encompassed leveraging React, React Hooks, Node.js, API integration, and testing methodologies. Notably, I honed my proficiency in managing Jira workspaces while collaborating within a team environment to meet project deadlines. This experience not only deepened my technical skills but also provided invaluable insights into agile methodologies, enhancing my ability to work effectively within a team to deliver impactful solutions.

- **Holiday Central**

Holiday Central is a Full-Stack application developed for booking flights, hotels, and packages. As a frontend developer, I designed the user interface and implemented data retrieval from the backend. Utilizing hooks such as useState, useEffect, useContext, and useReducer, I contributed to the development by ensuring seamless functionality and user interaction.

- **Netflix Clone**
  1. Build the application using React JS.
  2. To create the app I applied the useState and useEffect React Hooks.
  3. Used the TMDB API key to access the movie database.
- **FotoFirst**
  1. E-Commerce website for photographic and digital printing shop.
  2. Allows users to get details about the packages that they can buy.
  3. Allows registered users to manage their profile.
  4. System consists of a shopping cart.
  5. There is an admin panel. Can change details using admin panel.
  6. HTML, CSS, Bootstrap, PHP, JS.
- **PIG Game**

Developed a simple game using JavaScript. The game allows 2 users to play the game at same time. First players who scores 100 points will win the game. After end the game users can play again without reloading the application.
